Commissioners Burrows, Foss, and Stoltz,

Wow! That was a really great thing you guys did by voting to defund women's health services in our county-NOT! Please add me to the list of people that cannot wait for you all to be voted out. I pay taxes and funding for health care services for low income is one thing I do approve of. Because you have a moral objection to how services are being provided you feel right in making that choice for everyone? Is that really what you were elected to do? Push your moral agendas? Oh and I love that Commissioner Burrows is willing to pay for services that he thinks are worthwhile. Just how do you decide what a worthwhile health service is? Are you qualified to make such a judgement? And really? that is part of your job description to unilaterally decide what are worthwhile health services for a community? I don't believe these are the kind of decisions the voters want you to be making for us.

sincerely,  
Mary Warren
