Dear Commissioners:

I do hope that you take the time to review the Valley Viewpoint in today's Ravalli Republic regarding the Title X funding.

It is a factual representation of the services of Title X-funded clinics and the medical necessity of such services.

In response to Ms. Foss' interview with NBC Montana and her suggestion that the county fund the clinic, I am astounded that you are concerned about federal debt and NOT county debt. Is the county rolling in money that none of us know about? And how in this world can you compare essential health care services with hunting, fishing and the Humane Society? You are elected to represent your constituents, including helping them stay healthy. You ignored this role and voted to eviscerate our Public Health System.

Please open this issue to further debate to allow you all to see the error in your decision making.

Kathleen Harder-Brouwer, MD
