**To:** Ravalli County Commissioners  
**Subject:** Title X services

To whom it may concern,

I'm am contacting you because I fear your decision to take away these services offered to woman will resort to more abortions rather than young women practicing abstinence. While I agree that women should be practicing abstinence till marriage, this is not the case in our world today. These woman will be going and supporting the services of Planned Parenthood. Planned Parenthood does offer abortions services. I have received services from The Ravalli County Public Health Nurse for years and I have always been treated with respect and have always felt comfortable in the care of these wonderful women. Please do not take that away from so many women that I know have felt the same way.

Thank you for hearing me,

Deborah Brown
