Subject: Support for Continued Title X Funding in Ravalli County

Commissioners Foss, Burrows, and Stoltz:

Please reconsider the importance of Title X funding to the mostly uninsured population of our county that depend on Public Health's Family Planning program. This funding provides assistance to those that need it most. Please help prevent unintended pregnancies. Please help prevent the spread of sexually-transmitted diseases in our community. Please do not direct my tax dollars away from local use and send them somewhere else. I want those tax dollars to benefit my local community by providing much-needed services.

Commissioners Iman and Chilcott:

Thank you for your continued support of Title X funding. I am aware you disagree with some parts of Title X requirements, and I applaud your concern, compassion and common sense in deciding to support the program.
