**To:** Ravalli County Commissioners  
**Subject:** war on the poor

Why this war on the poor? What horrible crime have these women done to you that you would take money away from their healthcare? If we do not support basic bare bones healthcare for those in our great strong nation that need some help, they will continue to fail. Every single one of you got help at some point in your life. We do not live in isolation. The Title X money is there, available already. You will be the first in history to deny this much needed community money. Please allow this money to be put to work.
