i strongly object to your removal of our public health services and rejection of federal funds this county is entitled to. Those funds come from my tax dollars for services I have a right to receive. You have stood in the way of the common good of your constituents, failed to defend the best interests of your community, and created harm to a significant number of citizens in your county. If any funds should be withdrawn from the county budget it should be your salaries. No one should be paid for such poor public service.
