**Subject:** Airport Runway Decision

Being a pilot and owning an aircraft and a hanger at Ravalli County Airport, I feel this airport should be upgraded as soon as possible since all revenue has been acquired with no cost to tax payers. Runway 4B should be the Runway of Choice and this should be expedited as soon as possible.

Dear Commissioners,

I find it inconceivable that you could even think about turning your back on economic development and growth. Your airport is a vital element in your future. Without it you will stagnate and die. With it you will have opportunities and the prospect of an economic stimulus that will continue to provide benefits long into the future. Your question should not be to have an airport or not. Your only real question should be: What is the best possible improvement that we can make to this airport that will give us a grasp of the economic vitality and future that we need. There is only one viable answer: Extend the runway to the maximum now! Option 4B will give you the best result and the most return. I urge you to adopt option 4B.
