Subject: Natural Resource Policies

The county has amazing natural resources. They truly need to be cared for and kept for future generations to enjoy. The "Alternative Proposed Natural Resource Plan" has a vision that supports this goal as its fundamental point. I am writing to say that I support this plan over the other one which was first proposed by the Commissioners. Please allow a true collaborative effort (as in public meetings of Working Groups that include representatives of more than one point of view) to create a Natural Resource Policy that offers a more balanced view of how Ravalli County citizens can achieve long term benefits in a sustainable way from these precious resources.

Thank you.
