Subject: please pass on to commissioners

Commissioners:

I do not support your 'Coordination natural resource plan'. I don't go to bars so could not be involved with this process. The location did not work for many folks in our county. Public lands are managed by the federal government not the county. Your public process was not that at all. I'm sorry you have spend so much time on this very incomplete document. Please don't waste anymore of our money with another probable lawsuit with the Federal Government by passing this 'plan'.
