Subject: Grant Opportunity - Free Technical Assistance from Smart Growth America

Did you know... the Community Technical Assistance Program is not the only resource for free technical assistance, training and workshops in Montana? Please see below for information on an upcoming grant opportunity for technical assistance offered through Smart Growth America.

Applications are now being accepted for Smart Growth America's 2014 free technical assistance. Each year Smart Growth America offers free assistance to local communities interested in building stronger local economies and creating great neighborhoods. These workshops will be awarded to a limited number of qualifying communities.

Any unit or subdivision of local government, Indian tribe or regional government is eligible to apply for these free workshops. Communities should select one workshop per application; applicants may submit additional applications for more than one workshop. Applications are due by Friday, December 6, 2013 at 5:00 PM EST.
