Subject: Terry Nelson

Not only do we not need a planning department director/manager, we do not need the environmental health department, much less a director/manager. At present there is no enforcement of either dept., Violations of both are commonplace. Once again, I watch as incompetent commissioners try to make yet another croney appointment. For what good? If the incompetent commissioners whom appointed Stamey to the position of treasurer, are now suing her for not "doing her job," then as a taxpaying citizen, why is it not appropriate for me sue the so-called "county commissioners" for not doing their job properly. The appointment of Terry Nelson to yet another worthless position, (remember Wicznewski), is so out of line, it is only surpassed by the incompetency of those in position to make that appointment.
