**To:** Commissioners  
**Subject:** IMPORTANT CHOICE TODAY

At today's meeting you will be discussing the combining of Environmental Health and Planning. This is an extremely important decision, and it would be **EXTREMELY** unwise to choose to combine these 2 offices. Environmental Health needs to independent of Planning because there will be a conflict of interest with regard to choices made by Planning that are counter to what Environmental Health sees as the best choice. Also, there is nobody in the Planning office who is scientifically qualified to make the decisions that Environmental Health is supposed to make. Environmental Health **ABSOLUTELY** must be **INDEPENDENT** of Planning!!

With deepest concern,  
Patrice Promack
