Subject: No to combining Departments

Honorable Commissioners,

Please read this into Public Record.

I am offering my objection to combining the Environmental Health Dept. under the Planning Dept. The two objectives of the departments are at odds to be compatible, and should be.

The Planning Department is to objectively look over various uses of our County. The Environmental Health Office's job is to protect our county's citizens environmental health. To check our septic systems, to oversee our well permits, to advise us on radon levels, to check the operations of food distributors and to protect our wetlands. Then to finally advise the Planning Dept. You can't have the Planning Dept.

advise the Planning Dept. You need them separate.

I look at this as just another move on your part, our Commissioners, to ramrod your agenda on unsuspecting citizens.

We object! You are elected officials and you are to listen to us!

Sincerely,

Becky Peters
