Subject: Planning & Environmental Science

Dear Commissioners,

In light of other decisions made by this board, I am writing to register my disapproval of the combination of the Planning Office and the Environmental Health Department. These are two very different functioning departments and should not be merged for any reason. It is not appropriate to change job titles to avoid placing people with qualifications in jobs that definitely need people with specific qualifications. It is likewise inappropriate to combine departments with clear and definite differences that could be detrimental to the environment, as well as the citizens of this valley.

Please think hard and clearly about what you are doing and what has taken place in the recent past before you make any consequential decisions.

Respectfully,
Karin Stanford
