To: Commissioners
Subject: You have failed this city

We are not even going to get into all that you Tea Party commissioners have done to harm the people of this valley. We are not even going to get into all of what you do to harm the safety of this nation and on how you systematically disregard this nations Constitution and laws. You know you are wrong in your actions to take away the freedoms of the people. You know you are negligent and wrong in the many immoral and criminal acts you have committed against the good people of the county. You know. And you deny. But, the fact remains that we know what you have done and we know what you are doing. And you will not get away with your treasonous acts against the United States of America.

Do not combine the Planning Office with the Environmental Health Dept. Or you will have failed this city again. You will not get away with purposely poisoning our water which will kill many. Fire Terry Nelson immediately on grounds that he is not capable of doing his job. The entire county knows that he is just another one of your anti-government homeland terrorists working for you to bring harm on this county and to this nation.

We know that you will not head our concerns. We know that you will go ahead with whatever you want and damned be what the people say. We know you will decide to do the wrong thing. Mark our words on this as we know you will do the wrong things you can expect us to do the right.

I am just one citizen of many. And we are tired your immorality and treasonous acts.
