Subject: Do not weaken water regulations!

I understand that there will be a meeting to reduce the regulations in place for our drinking water, to weaken our environmental health regulations. DON'T do that! What are you thinking? do you commissioners work for the common good or for the private industries?

Stop weakening the regulations and make the realtors and developers pay for high quality water.

The Legacy Ranch is an example of how Ravalli County Commissioners did NOT listen to public opinion, actually went against our voice and voted to approve this monster right next to our pristine, VALUABLE wildlife refuge. We will continue to fight that.
