Subject: Keep Environmental Health Independent

Dear Commissioners,

I am against merging the Environmental Health and Planning departments. The pristine nature of water in the Bitterroot Valley should never be compromised by putting a manager (not a planner) in charge of the scientists who determine the location, size and type of septic systems here. Please, Commissioners, make the correct decision this time. Keep Environmental Health intact and with an advocate for clean, pristine water. That -- along with other beautiful elements of nature -- is what encouraged us to invest in this community. It is what will continue to bring energy and investment to the valley.

Sincerely,
Alex Shaffer
