Dear BOCC,

I have contacted the road department with concerns about the disrepair the road system in the valley is suffering under the current leadership. I was informed the department is currently " very understaffed". A result of poor decision making by the above stated current leadership. I was additionally informed that a once well staffed department is now required to reach out to other entities (ditch companies) to help take up the slack created by depleting the road department workforce. I am sure the remaining crew is going as hard as they can and could perhaps use help filling potholes, sandbags, ect. from the BOCC.

I would appreciate a response to these issues.

Thank you for your time,
Denton Erickson
Former Road Department employee
