Subject: Thank you.

March 25, 2014

Dear Commissioners:

Thank you for not combining the Environmental health office and the Planning office and instead putting an educated, experienced sanitarian in charge.

Interestingly, I heard from the board of Realtors that they did not propose the office merging to you but that Commissioner Stoltz called them and requested a letter of support in January. They immediately put it on their agenda and accidentally did not tell the Realtor membership. That all seems very strange. Is this kind of thing done frequently with Commissioners requesting support like that?

Thanks again for doing the right thing and not compromising our environmental health.

Sincerely,

Sarah Roubik
