**MEMO TO:** Public Use Airport Sponsors  
**MEMO FROM:** Derrick Olheiser, Airport/Airways Bureau  
**SUBJECT:** Recent 5010 Inspections

**Announcement:** In the past this memo has been mailed directly to the Airport Managers. The new practice will be to mail this memo to the sponsor and let the sponsor disseminate to the manager and/or as they deem necessary.

The Montana Department of Transportation/Aeronautics Division, in accordance with the FAA 5010 inspection program, has recently conducted an inspection of your airport to update the FAA's 5010 Master Record files. I met with several of you during the process and this is highly appreciated. Enclosed are the results of this inspection, namely, a copy of the marked up 5010 inspection form, and a safety data inspection sheet.

For those of you who need a little refreshing on what the 5010 inspection is, here is a brief overview. In order to assure that the nation's small public use airports do not fall into a state of disrepair and to alert the flying public about potential hazards at airports, the FAA has for a number of years now, mandated that every non-certified, public use airport in the U.S. be inspected at regular intervals. The results of those inspections are compiled in the form known as the 5010 Master Record. In the State of Montana, the Aeronautics Division is responsible, in most cases, for completing the 5010 inspections under a grant from the FAA. The purpose of the 5010 inspections is to gather information that can be disseminated into various flight publications. Most notably, the FAA Airports and Facilities Directory, or sometimes referred to as the FAA green book, derives all of the airport information within it from 5010 inspections. Other publications such as aeronautical charts and instrument approach procedure plates also derive some of their information from these inspections. Numerous privately produced publications rely on 5010 information as their primary source of data. Information is determined during the inspection including close-in obstructions, hazard obstructions, number of airport operations, visual landing aids, pavement conditions, lighting information, and various other safety and general data elements. The inspections also determine, or verify, runway approach slope obstruction gradients. These are used in determining whether runways meet the necessary criteria for precision and non-precision approaches.

I would like to stress that these inspections are NON-regulatory in nature and the airport is not required to pass the inspection. These inspections are performed in the interest of safety and facility notification. A copy of general information is sent federally, and a copy is kept here in our offices. Data elements on the 5010 form which are preceded by a ">" symbol is considered critical safety items and as such, you should report any subsequent changes in them to your FAA Flight Service Station at 800-992-7433.

Page 2

August 20, 2019

Public Use Airport Sponsor and Managers

One of the items you have received is the Safety Data Inspection Sheet. On this sheet attention should be directed to the elements that have comments. We recommend that appropriate measures be taken to correct those problems, not only to improve the condition of the airport and enhance safety, but also to lessen the threat of liability exposure. An airport owner may be held liable for an accident or incident that occurs with contributing factors such as an improperly maintained approach slope surface, bad runway markings, or safety area surface obstacles. Remember, it is an airport manager's responsibility To request a Notice-to-Airman (NOTAM) be issued to advise pilots of any safety-related problems that cannot be immediately corrected. If you received a wild life survey please complete and return if this has been completed.

The Aeronautics Division appreciates your efforts to provide a safe general aviation airport to the flying public. If you have noticed any discrepancies, would like to add anything, or have questions regarding the inspection, please feel free to contact me at the Division 406-444-9592 or by email at [dolheiser@mt.gov](mailto:dolheiser@mt.gov) . Thank You.

## Olheiser, Derrick

---

# AIRPORT SAFETY DATA INSPECTION SHEET

AIRPORT: Hamilton

INSPECTOR: Derrick Olheiser, Aircraft Technician

INSPECTION DATE: 6-26-19

Runway Surface is/has: Explanation:  
 Rough/Uneven  
 Foreign Object Debris  
 Cracks Greater than 1/8"  
 Other

Runway Edge and Sides have: Explanation:  
 Erosion  
 Weed Encroachment  
 Other

Taxiway Surface is/has: Explanation:  
 Rough/Uneven  
 Foreign Object Debris  
 Cracks Greater than 1/8"  
 Other

Runway Markings are: Explanation:  
 Non-Standard  
 Faded  
 Other

Taxiway Markings are: Explanation:  
 Non-Standard  
 Faded  
 Other

Runway/Threshold Lights are: Explanation:  
 Non-Standard  
 Broken/Missing  
 Obscured by Weeds  
 On Non-Frangible Posts  
 Other

Runway/Threshold Cones are: Explanation:  
 Faded  
 Spaced Oddly  
 Obscured by Weeds  
 Other

N Taxiway Lights/Markers are: Explanation:

- Non-Standard
- Broken/Missing
- Faded
- Obscured by Weeds
- Other

✓ Segmented Circle has/is: Explanation:

- Windsock which is faded
- Windsock which is missing
- Faded
- Obscured by weeds
- Other

✓ Mobile Hazards on Runway: Explanation:

- Vehicles have Unlimited Access
- Livestock on/in Vicinity of the Runway
- Birds on/in vicinity of Runway
- Wildlife on/in vicinity of runway
- Pedestrians on/in vicinity of runway

#### OBSTRUCTION DATA

The following obstructions were identified within the approach surface for the identified runway end. Only those obstructions that penetrate the following approach surfaces are listed: 20:1 for visual approach runways and 34:1 for non-precision approach runways. Slopes are in terms of run to rise in feet.

<u>Runway End:</u>	<u>Previous Obstructions</u>	<u>Current Obstruction</u> 19:1
34	Trees	Trees 2857 ft 5.2% <del>2857 ft</del> 148 ft above Rwy end Rmk 92 ft 304 ft 140 ft to L 30.4% 31:1

The following items were identified as obstructions within the primary surface or runway safety area of the following runways:

Rmk 16 Shrubs, 325 ft from End 30 ft to left 7:1

Other additional comments:

16 guide slope lamp in op
