in the beginning, there were fists. and the leader kinds were always esteemed based only upon being ranked first-fist, because wrath had always got the job done for pappy and he turned out real good. so, those held under, only always knew to go along for their own good...becoming that...respecting that...even revering that. if you weren't that, you died. so, this was red, the color of blood. So, the leader kinds always had all of the mola. and even as mola was gold it was green. and they always gulped their role in their higher-than-you class, for they did live like fat off the hawg. so, this was state. and the under class kinds swore oaths of allegiance and lived in the dirt, bowing and bent continuously, becoming mighty nations to be feared and respected. so, this was for your own good. and this was believed to be wise. so, they only always groped to fashion up designs for mola, so that they, too, might be esteemed and elevated into the higher class to run with the boss hawg elitist cows. and then, there was always the almighty one, too. he trampled out the vintage where the grapes of wrath are stored...and always only said, "for your own good, you shall love me and be afraid." everyone liked an everlasting cloud 9 party, so this was believed to be wise continually. so, this was killer spook sky gawd. and he was always the big dad to incite fear continually into the never used brains of the vast herd seen to scuffle for mola while claiming chosen status continually. so, this was state to promise everything good like a party. and everyone liked that. by and by some upstart cows congealed liberty to compound upon mola by promising a chicken in every pot. so, we should see, this was the liberal agenda to get all you can to be conserved continually - always as much the sacred cow tradition. so, while the boss kinds gulped, busy flaunting their place, and the underkinds stayed in the box, busy pursuing party time, by always casting red and green, everything vitally essential for a lasting survival was continually shit full up and went stinky brown. so, if you make brown, forget about it. the end. #42

WHAT DO YOU BELIEVE IN?

certain collapse is already fulminated by the "get all you can by any means to be happy" *perennial philosophy* burned into the very substantive fibers of RNA-DNA. This is the *calcified power predator machine aesthetic* that appeared in our first ancestor uncles in those long ago tidal pools. YES! these are our first pappies. This *machine organism* lived as a remembering machine...remembering to replicate, consume and eject waste. The stock of all evolution is entirely *predator machine*. And only this is revered continually through all time.

If you truly believe you are doing the good work, I ask you, "Are YOU WALKING THE TALK?" At SOSA, WE ARE FAIRLY CERTAIN THAT YOU ARE NOT WALKING THE TALK....still driving a fancy car? maybe a Prius? ok...still livin' high off the hungry hawg of degenerative capitalism? yeah...got toys? got condos in other towns? got a fat house, huh? maybe you even think you're doing the good work as a "good Christian"...really? old [god] of Abraham infects 1/2 of all people...drowned everything? really? killed his own kid? really? suffers wrath, too...like your dad and his ol pappy before him? really? here's the paradigm...cobbled in junk belief....THE ONLY BELIEF EVER KNOWN ON THIS EARTH...degenerative in all its expressions...why? because it's based upon false inferences and false premise. It has never been questioned in the world value arena. It routinely steals freedom by violating the right to freely choose.

these are plain points of public welfare law...violated every day...very likely even by you. WHAT IS YOUR CARBON FOOTPRINT, HUH? If you are an ameerican, your annual consumption footprint is likely 24 acres----this! for virtually all ameericans. And what is your FAIR SHARE? 4.5 acres. You cannot be serious about "progressive ideas" if your footprint exceeds 4.5 acres.

we, here at SOSA, have pared our consumption down to about 4 acres already. WOW! how'd we do it? easy. we just got rid of the fat...turned our back on the *calcified animalized power machine* that infected our belief since birth....we are free spirits no longer oppressed by the *animalized capitalist fascist power paradigm* that infects our world since day one. If you are serious about changing the paradigm, it is essential that you FIRST learn what the paradigm is made of. I am fairly certain you haven't done that, so my words sound like ranting and raving to you so you get irritated...angry even and shut your ear holes while flapping your jaw dropping ignorance out from your closed camp. huh.

ISN'T IT OUR TIME TO FINALLY RISE ABOVE IT AND BECOME BETTER STUDENTS OF WHO WE ARE?...NOT AFRAID TO CALL THE URGENT EPOCHAL QUESTIONS OF BAD HUMAN BEHAVIOR--ESPECIALLY THA TOF MEN?

■ in all the days of these cow kinds, to improve the world was a common belief. and this only always meant that any sort of thing done to compound upon money was continually known to be wise for getting ahead. So, these cows always believed themselves the designated ones chosen by killer spook to employ any means to that end. and, this always occupied the core presence of all schooling to perpetuate the liberal agenda to get all you can. so, even as some made calls to vigilance, they only said we need to leave the world better than we found it, even while adhering to the good business practice of turning a profit or getting a fat salary dole out of the non-profit accounts. so, as this never meant to effect improvements upon mentality, so too did it mean that no one really wanted to sacrifice for the sustainable good. so, everyone just always forgot about the brown. *the end.*

**Subject:** publishers demand NEW THESIS

cheezuz! that last SOSArant sure was something! Sorry I get so riled up these days because the world is more sick and more stupid than even for words to describe.....can we shit things up any worse? sure we can!...**YOU GOOD PUBLISHERS should be demanding a new thesis for actually achieving a meaningful sustainability! YOU SHOULD BE DEMANDING AN ACTUAL PLAN FROM YOUR AUTHORS! perhaps invent one yourself!!** just by standing by, aren't we [to be polite, I say "we"] tacitly supporting the bad red power machine paradigm that

just keeps pounding all vital things into the cess pool?  
**WTF? ALL VITAL THINGS ARE CRASHING  
NOW!!..**

here's a SOSA thing: wanna help stop bad oil? get an electric car! demand all electric hybrids able to run 150 miles per day on a single charge....that's like totally SOSArad! and guess what? our old fascist unkle sam he don't care about no dang sustainability or protection of the vital common trust or the right to freely choose! "Dammit JIM!! I yam only a doctor!! HOW can this be?!!"

Look, have I always been "ranting"?..hmmm...in the late 1800's a very smart man named Nietzsche was speaking a foreign language, entirely sagacious as profoundly centered upon man's dubious *value* as the designated improver. So, he was also perceived as ranting, was misunderstood, has been vilely quoted out of context and was used by that asshole hitler to further his twisted animalized power predator cause by twisting the words to suit him..."great german philosopher"..no, thanks to his sister and her ricardo cabeza husband Forster...In 1887 he was already showing the *Third Reich in its true colors* and the pure folly of humankind scuffling their *will to power* into every outcome...the animalized machine predator joke cooked up in the

brackish waters of ancient Earth. So...Philosophers are most often perceived as ranting. You see? regular cow-folk don't want to learn the lingo because it's too hard..."I don't want to think that hard," a friend told me. So, no one - not even you very likely - hardly knows to know what it means that one must go down to come up. Published in 2009 [two more published] my first book is the first form of an evolving thesis for achieving a meaningful sustainability. It is founded upon a single clear principal thing in itself - routinely overlooked and readily accepted without question - that there is only one belief system comprised of two elements that **defines the paradigm**...that it is both universal and continuous throughout all time. With the first RNA remembering machines to appear in the far ancient tidal pools, our one universe tipped its hand when it made *animalized predator machine urge-to-power---mind---animus instinct to motivate upon all outcomes...REVERED at first rank as the supreme virtue*. Later, knowledge and imagination of right and wrong [morality] were invented when *reflective conscious* appeared. These arrogant little butt hole surfers [I color outside the lines in case you haven't noticed] suddenly esteemed themselves as *divinely chosen and superior to have dominion*. This farcical

notion was and still is accomplished by deploying POWER in the form of wrath and brute strength...so pappy turned out real good without no learnin'. These are what make up the *only paradigm* to ever exist on Earth. It is a stupid fuck of a paradigm created by this one universe that just never looks like anything at all divine. So we, should see if we have any kind of good educated eye sensitized for ruth for seeing, that it is ,indeed, time for a new one.

Do *You* want to change the paradigm? sure, who doesn't? most vigilant camps do. but no one has bothered to completely identify the components that have come together to form the paradigm everyone wants to change and how they affect all outcomes by constructing the institutions based entirely on *machine principles...maybe you actually believe technology will save us*. You see? a paradigm **is** based only upon what a peoples believes...so, until we lay down the **plain self evident fact that belief is not truth...that belief is not knowledge**, that one does not have any right to pound their belief into another because it violates their fundamental *a priori* [fancy latin word means that all lives are born with this right...that you actually had this right before you were born] *right to freely choose*...and that means we have a plain *obligation* to protect all vital

things to nurture all free spirits into life themes of generative creative experience.

At SOSA, we have identified the paradigm and what we might do to actually change it. The SOSA thesis is worthy of any doctoral dissertation...and dares to shed some light upon the **two things** that comprise the

*archaic paradigm. It's time to finally reckon*

*the CAUSE of all degradation, suffering and*

*calamity---bad animalized behavior of men needs to*

*stop. could this be true?...learning the new language*

*that is germane to a new paradigm of "we-us-ours"-*

*--->Earth community--->>true democracy--->creative*

*experience schooled at self pace...*

there is no accounting of true costs...not now...not ever.**

**the *underman* believes in "rights to pursue happiness at all cost----we teach our children: "to be a success, you gotta get all you can in life."**

**happen if you don't. Infecting children with this fool junk violates their fundamental right to freely choose---to freely make their own vitally meaningful creative experience.**

**To change this paradigm means to change the dialog. We must unite now to call these epochal questions at the world table.**

**WHAT'S YOUR CARBON FOOTPRINT? HAVE YOU DONE ANYTHING TO REDUCE BELOW THE 24 ACRE AVERAGE WE SUCK DOWN HERE IN AMEEERICA? YEAH...right here in this land of the free and home of the brave, we got a: first fist - first blood - free for all - smash n grab for jesus....and the so-called *progressives* put on their game faces while they drive their Lexus and their beemers to work and their 4 door jeeps too, and then they sit in their chair and write smart and talk smart and get donations and get a paycheck and go to hot lunch and go home, stopping at their watering hole to talk smart with crony kinds and go home to sit in a fat chair in a big house and got to bed and tell themselves these lies at night, "yup, I did good."
