**Subject:** VIRUS

What the hell?! Are all of you idiots. Just because there is not a reported case of the virus in Ravalli County is reason enough not to protect the citizenry and close restaurants, bars, gyms and non essential businesses? "PREPARE FOR THE WORST AND HOPE FOR THE BEST"

With all the warnings from experts of asymptomatic people and all the at risk elderly in the county your lack of proactive, sensible decisions should be criminal. Waiting for a reported case or a death before acting shows such a lack of intelligence and stupidity that if there is a case reported, I pray it is to either yourselves or one of your loved ones... Take gyms alone for one example, no matter how clean they seem or responsible the owners or management, inherently they are an incubator for bacteria and viruses. Do your job, be proactive immediately. I will do all I can to spread the word to the media and other sources and be extremely vocal to convince Ravalli County citizens to vote you out of office. You all are baffoons.
