Subject: J Olsen COVID info

Dear Commissioners,

I strongly encourage you to read and begin to implement some of the valuable tips and information Mr. Olsen has provided you in this very serious time of COVID-19 pandemic. We are fairly isolated here, but do not mistake that for complete safety.

Our hospital and particularly nursing staff must be well equipped with PPE to deal with what may come. Please help us all by getting ahead of this.

3-D printers may be used to make certain items like ventilators, and face masks with replaceable filters. Contact The Bitterroot Fab Lab to engage them.

Please reference the following articles, one from Ireland, and one from a doctor right here in Billings MT:

<https://techcrunch.com/2020/03/19/open-source-project-spins-up-3d-printed-ventilator-validation-prototype-in-just-one-week/>
