**Subject:** Fishing risk to community

My name is Bill Peters , I live in Hamilton, am a fly fisherman and a physician. I am very concerned that as out of area people come to fish our river they will not be held to a 14 day quarantine, also the guides that take them out will not be quarantined after the floats. There is a significant risk that our area will develop the same problems that have occurred in Sun Valley, White fish and the Gallatin areas where out of states coming here to escape have brought the virus. This infection is very real and unless everyone does everything we can to slow it we all will pay a price. Washington State has closed down fishing for now and I have asked Governor Bullock to do the same . I also will call Triple Creek and ask them to quarantine the guests.

It is very sad that we must consider this but in the interest of all residents in the county I know of no other option. We are not getting solid leadership federally so we must make tough choices locally.

Thank you for taking time to consider this , you are in a crucial position to lead , Sincerely, Bill Peters, Hamilton
