Dear Board of Commissioners,

Ravalli County Commissioners

--	--	--	--	--

Please find enclosed the new video production of *Blue* by my young friend J.D. (Jeff) King. You will probably remember that several years ago I sent J.D.'s first film *Crying Wolf* to all the County Commissions in Montana, asking that you all view and share that important film production with others in your county government.

Jeff's new film *Blue* exposes the faulty science and real agenda behind many of the public lands and environmental policies being adopted and implemented by well-meaning, but often ill-informed, political leaders at all levels of government. Surely the most intellectually challenged amongst us must recognize the lack of government accountability and the loss of liberty and property rights that have become the norm in rural America over the past 20 years. Influence over land use decisions bought with Tax Exempt Foundation money funneled through environmental NGOs is reshaping federal land policy all over rural America. The regulatory powers being exercised by the EPA through an ever expanding list of unconstitutional administrative rules mean that we are no longer masters of our own lives, land, or possessions. We are losing the once great republic that our forefathers fought and died for, and it's being accomplished without a shot being fired. We are being herded like sheep to the slaughter by powerful global socialist organizations and policies that care nothing for our liberties or rights as Americans.

Please accept this complimentary copy of *Blue* and share it with your Board of Commissioners and other county officials. I have personally purchased this DVD and paid all shipping and handling charges associated with its distribution because I understand the need to stand and be counted in the fight for rural America. I thank you in advance for watching and sharing this film with others.

In liberty,

Dan A. Happel / Madison County Commissioner
