Subject: Health meeting today

Dear Commissioner,

I recently heard about the health meeting that will be taking place today and am gravely concerned. First off. Why have this meeting at 2pm when many people are trying to work whether from home or an essential job? I am not sure what would warrant, not just a meeting, but a thought of making Ravalli county a POLICE county. The state of Montana had a little over one million people in which we have roughly about 312 cases of the Corona virus with 6 deaths. Only 2 cases are in Ravalli County. In the past year, we have had a staggering amount of more contract the flu virus and/or die from said virus and nothing said or done. I promise you people are checking the CDC reports. Most people have complied with the requests made by governor Bullock and have stayed home, limited their trips, have practiced social distancing, have been wearing masking and practicing good sanitation. So again, why this meeting? The numbers do not add up, the evidence is not there. And frankly, You do NOT have the authority to infringe on our Constitutional rights! There are many many people upset with this meeting that is to take place and feel that this is grossly overstepping your authority.

So, I am strongly suggesting to you all that this is a very bad idea and need to be voted NO on the possible criminal citation of people that are thought to be non-complicance.

Concerned Citizen,

Mrs. James
