I wish that you all would take the mandate seriously. I wish that you would listen to doctors, nurses, scientists and so forth that have had years and years of experience with viruses. Our area is home of many retirees, they are at risk. Our area is home to many people with varying illnesses and they are at risk. The approach you have decided to take is disheartening, and makes it seem like you don't care for those people, for our people. How can we all be in this together when you create diversity by telling people its a mandate not a law, we are not going to enforce this, decide for yourself. You can not expect people to come together when you provide that kind of response. We have 2 labs in our area, and instead of listening to those people we are deciding to put people at risk. We have highly educated people in our area, qualified people, and yet we choose not to listen to them or even talk to them about these matters. This is all disheartening.
