Subject: [EXTERNAL] board of health meeting

To whom it may concern: while most valley residents are focused on the kung-flu and how it effects the community.

There is a much larger threat. Actually two, the BSL4 lab and GSK. Absolutely everything in the BSL-4 lab is deadly and has no known cures. BSL-4 labs are only for bio-terrorism. GSK wants to inject us with gene altering and or chip insertion vaccine.

So, talking about the health, safety and security of the citizens? You are blowing smoke up our ass to think you are for real! The Citizens of the world thought wuhan was safe also. Further, there is absolutely no real security for either.

Most Sincerely,

Askjel Von Madalhar
