Subject: [EXTERNAL] Covid 19

Dear Commissioners,

I was very disappointed that you did not make any recommendations for controlling the spread of covid 19 in Ravalli County after your " meeting".

The fact that you cannot and do not understand or support the science behind masks is ludicrous. I can only surmise that this means that you do not follow any science. You cannot pick and choose what science you are going to believe in. Therefore you should not be able to access any care surrounding Covid if you were to contract it, as you cannot get behind any of the science to control the spread of it. And you seem to be inferring that it is a hoax.

In fact you should not be able to go to the hospital at all for any health ailments, heart problems for anything , if you do not believe in science. Science is what created treatment for healthcare issues that allows us all to live longer better lives. How do you think they developed treatment for cancer etc. SCIENCE!

Every day people at the NIH lab , in our community , which by the way is a big part of the economy of this community, people study and discover new treatments for ailments that all of use. I guess what I hear you guys are saying is that we should listen to people who are not educated in science or medicine te guy who works at the gas station or construction site , to tell us how to treat disease and viruses.

This is crazy. This isn't about freedom. And it is political. If Donald Trump was telling you that you should wear masks you would. The people in the meetings would not be going against the masks.

You should be following science and not a man that has no education in medicine. You are risking all of our lives.

As I stated none of you should be allowed medical care if you get any symptoms of covid or really any sickness. You are against science that is clear.

Sincerely ,
Leslie Striebel
