All do respect, every state is dealing with the feds and most other states are doing better than Montana. Ravalli County only recently even set up a central sign up and it did not include details beyond 1B. It does not seem that our county and the state of Montana is not making this a priority.

Michele,

We (Ravalli County) are requesting vaccine from DPHHS, but are not receiving a proportionate share of doses. We are in constant communication with the state to increase allocations. There is no justification from DPHHS why Ravalli County is proportionately low. DPHHS is saying they are receiving an inadequate supply from the feds.

We have capacity to administer much more, but vaccine is the limiting factor.

Jeff

Good morning all

Just so you know... Ohio is already on 65 and older for vaccines. They have already vaccinated medical workers, residents of old folks homes, essential workers including teachers, 80 and older, and 70 and older. What is going on in Montana and especially Ravalli County?

Thanks for your time

Michele Dieterich
