Subject: Roadway Functional Classification Review

The Montana Department of Transportation (MDT) has been engaged in a statewide review of roadways and their relative Functional Classification. The Functional Classification of roadways is required by the Federal Highway Administration (FHWA), guides and informs the work we do at MDT, and may have implications for the funding eligibilities for roadways in and around your area.

A statewide review of functional classification in Montana was last completed in 1992. Since the last statewide review, almost 30-years ago, much has changed in the state of Montana resulting in the need to evaluate the current Functional Classification across the entire state.

As we continue this review, MDT would like to provide an overview of the functional classification process to local officials, answer any questions you may have and understand any concerns as a result of this effort. MDT will be providing four zoom-based meeting sessions in the coming weeks to accomplish this. This review process may change the functional classification of the roads in your area and we encourage you to register and attend one of the following sessions.

- Session 1: Tuesday, March 23rd/11am
- Session 2: Thursday, March 25th/11am
- Session 3: Tuesday, March 30th/3pm
- Session 4: Tuesday, April 1st/1pm

Please call or email Brett Carter at 444-7252 or bcarter@mt.gov to register for one of these sessions. Once registered you will be provided an invitation to that session.

We look forward to providing you with the details of this statewide functional classification effort and answering questions you may have.

Thank you,

Carol Strizich
