Subject: [EXTERNAL] Retaining Dr. Calderwood

Dear County Commissioners and
Katie Scholl, Dr. Michael Turner, Roger De Haan, Dr. Wayne Chilcote (who we do not have emails for)

We recently attended the Board of Health Meeting on October 8th and have some questions related to retaining Dr. Calderwood as our County Public Health Officer. By way of understanding better who we are and, where our “limited” medical knowledge comes from; we have 5 doctors, 2 RNs and a hospital administrator in our immediate family. *You can probably imagine the discussions at family gatherings over the last 18 months.* We feel that this makes us a tad more in the know than the average citizen in this current environment of Federal Government abuses and corrupt medical information floating around social media. We know that we want a Public Health Officer who is a creative, common sense and independent thinker, much like the members of our own family. We do not want an official that is blindly following the NIH, CDC or AMA and will explain why in detail.

We do not personally know Dr. Calderwood and don’t know her medical philosophies or training but we would like a better understanding of where she stands on key events that have taken place. We also think it would better serve your decision if you were to gain knowledge on where she stands, as well.

AMA (American Medical Association) – Does Dr. Calderwood belong to the AMA? In 2010, the vast majority of Family and General Practitioners left the AMA because of its support for Obamacare. The AMA are now being directed by the big pharmaceutical companies and big government, not their membership. They do not represent the front-line doctors who are caring for COVID patients. One example of their recent medical malpractice was their position on Ivermectin. They determined that physicians should “immediately stop prescribing Ivermectin” while 88,000 prescriptions per week were being written by these family doctors around the country. Ivermectin is used 20% of the time for off label use and has been life saving for COVID patients. This directive had nothing to do with the dangers of Ivermectin and everything to do with big pharmaceutical companies taking priority over the lives of our citizens. On a personal note, our brother in Boise has written countless prescriptions for Ivermectin to care for people all over the country who were NOT being properly cared for by their local health care facilities. Where, exactly does Dr. Calderwood stand on Ivermectin?

NIH (National Institute of Health) - It has just been revealed that the NIH was complicit in funding gain of function research in China. 3.1 million dollars was given to the Wuhan Lab of Virology through Eco Health Alliance to back coronavirus research. These federal funds were specifically used to fund “finding and altering bat coronaviruses that could jump to humans and infect them”. What is Dr. Calderwood’s position on the behavior and recommendations of the NIH, understanding that they may very well have caused our current COVID endemic?

CDC (Center for Disease Control) – Does Dr. Calderwood believe it is her responsibility to always following recommendations, mandates, directives of the CDC?

Vaccines – The CDC has recently changed the definition of “vaccine” and “vaccination” because the current COVID vaccines are not as effective as expected. COVID is not a disease, it causes a variety of diseases and the CDC admitted that the effectiveness of the vaccines are “waning”. Yet, despite the questionable efficacy of the vaccines, the Biden Administration plans to try and force a vaccine mandate regardless of your current health, your history of having COVID, past vaccine reactions, etc.... This is an unconstitutional, un-American and disgusting overreach of our government and

should not be tolerated on any level. What is Dr. Calderwood's opinion on the vaccines and the current mandate that was announced?

Masks – The Biden administration changed their position on masks based purely on the fact that they were threatened by the national teacher's union. On 5/13/21, the "vaxxed or masked" campaign was announced by the CDC. Emails obtained show that the teachers union threatened the administration to change that to "all masked regardless of vaccine status", which it did 2 days later on 5/13/21. No science, pure manipulation. What is Dr. Calderwood's position on mask mandates?

We would be very interested in having Dr. Calderwood respond to these questions at the October 13th Board of Health meeting and, would hope you would desire the same.

Thank you for your time and consideration,
Patty & Rick Franklin
