

The 2021 irrigation season  
is coming to an end

NorthWestern<sup>®</sup>  
Energy

Delivering a Bright Future

## Winter is just around the corner!

As we approach the end of the 2021 irrigation season, here is some important information regarding your irrigation service. The service will remain energized throughout the winter months, unless you specifically contact us to request the service be turned off. If the service remains active, regardless of use, seasonal fees will be applied to your account the following irrigation season.

If you anticipate making changes or additions for your irrigation system, please contact us prior to purchasing any equipment as it could affect the electric load in 2022.

Rebates and incentives are available to qualifying irrigation customers through NorthWestern Energy's Efficiency Plus (E+) programs. Rebates for Variable Speed Drives (VFD) on irrigation pumps, instant rebates for Motor Rewinds, and custom incentives for new or existing irrigation projects are available. Visit [www.NorthWesternEnergy.com/Eplus](http://www.NorthWesternEnergy.com/Eplus) for more information.

Should you have any questions or need additional information, please contact us Monday-Friday, 7:00am to 6:00pm at 1-888-467-2669.

Always remember to work safe around irrigation systems. Safety is a lifetime commitment.
