**Subject:** [EXTERNAL] Injection to stop voter fraud

Dear Commissioners,

I pray that the court injection being prepared and released tomorrow, 22 April, to remove the illegal voting processes from our elections will put a stop to the fraudulent election system in the United States of America including Montana.

The discontinuation of Early voting, the removal of drop boxes, the elimination of mail in voting except for real legitimate reasons, the introduction of state of the art secure paper ballots, the removal of all voting machines, being replacement by hand counting by each precinct and tallied by hand in each county and passed on to the state for final tally and the introduction of FULL forensic audit to verify the result before certification.

This change can be accomplished and will be the only viable option to eliminate the rampant election fraud that has been built into our election system for a couple decades.

Please quit the naysaying that it is too much work and too difficult and too complicated and too everything to get it done. Turn it over to real American ingenuity and people with a can do attitude and ones that have the capability and get out of the way. There are so many examples of how American knowhow has accomplished remarkable tasks when given the opportunity.

There is no hiding behind the false narrative that Montana did not have very much voter fraud. The reality is there was more voter fraud, per capita, in Montana than most of the rest of the states in America. If you do a little research it will become absolutely clear that election crimes were committed and will be committed in every election if not stopped this year!

A good friend of mine, Gordan Harmon, always used to quote one of the founders of our nation, " You can fool some of the people some of the time, and you can fool some of the people some of the time, but you can fool some of the people some of the time." Very profound if you really think about it.

Charles
