Subject: [EXTERNAL] Election integrity questionable in Montan

Follow Up Flag: Follow up
Flag Status: Flagged

Jeff, Regina and others,

Just one little fact that causes a question regarding the election integrity in Montana is the results number of votes tabulated for Secretary of State.

Secretary of State, a relatively unknown candidate, who by the way earned her credentials in a Democrat administration, garnered more votes than any other elected official in Montana politics.

How do you explain that?

The real explanation is that she was the selected person for the job and the algorithm over compensated to make sure she had enough votes!

Oh yes, the A.G. is right up there in the high number of votes also, another selected official who received more votes than the President? Really suspicious.

The CVR would sort out the truth of these anomalies, but you do not want the truth to be known!

Secretary of State = 352,939

**A.G. =
348,548**

**President =
343,602**

Governor= 328,548

Senator = 333,174

Representative =

339,1969

Auditor = 326,742

You people need to admit what, deep down in your soul you know for a fact, that the election system is so screwed up that you are being played for the fool by denying ANY MALFEASANCE.

**GET RID OF THE VOTING MACHINES!!
OUR REPUBLIC IS DOOMED WITH THEM.**

You can not deny there is massive election fraud and corruption all over the country as evidenced by republican elected officials overwhelmingly do every thing they can to block every investigation of voter fraud and corruption.

You all are a prime example of the agenda to cover up all election fraud investigation by refusing my FOIA request for the CVR report on the 2020 election. You have run out the clock, just like the RNC and A.G. in Arizona have done every step the way for 22 months to delay any action until it is too late.
