Subject: Attention: Ravalli County Airport

Jack and Marilyn Saunders oppose the Ravalli County Airport extension and the resulting expense, air, water, soil, and noise pollution. Additionally, we oppose the taking of federal funds for the plan currently under consideration.

Had the previous approved ICAARE plan been acted upon, this expansion would probably be completed by this date and with little expense to the citizens. Go back to the 2011 accepted and approved FAA project.

Why are we expected to accept the current deficient EA when a full EIS should be demanded if this plan is accepted?

The comment period and approval process should be expanded and a county-wide vote with every citizen allowed to vote put into place before any decision is made on an issue of this dimension.

Please, consider what impact this decision will make on the citizens if carried through.
