**Subject:** Ravalli County Airport Expansion

We have been, are and will continually be opposed to the expansion of the Ravalli County Airport to accommodate larger, corporate style turboprops and jets for numerous reasons, We do not foresee this expansion as a benefit to the public at large. The county commissioners have taken it upon themselves to attempt to do this expansion without a referendum from the voting, tax paying public they serve. The public does not serve them.

Based on the recent primary election results we not do believe that the voting public would support this large commitment of County funds when the commission has been so lax in its administration of county funds that it has already embroiled the county in court actions due to its negligence in basic fundamental government administration.

Thumbs down on the expansion.
