**Subject:** Ravalli County Airport

Ravalli County Commissioners,

I am in favor of expanding Ravalli County Airport. I was born and raised in Hamilton. The airport has been at its current location before I was born in 1962.

Following reason for expansion:

1. Safety (in multiple ways)
2. Increased value to community by
  - a. More people employed at higher wages.
  - b. More dollars spent into our local economy.
3. Increased hiring in our company
4. Stop the decay of our airport and bring up to current standards

I am a private pilot obtaining my license in 1980. I fly for business purposes. I have ratings for both single and multi-engine aircraft both VFR and IFR with a light jet type rating. I have flown in North America to many airports. Our airport is behind in quality and services due to a stalled decision to move forward. Over the last 5 to 10 years Ravalli County airport has accumulated issues that should be repaired. But have not due to throwing good money into a project that should be completed. The opposition to the airport expansion has been successful in stalling the process.

A lot of false information has been thrown out to the general public. Stop the madness!

Please vote now in favor of the current plans for expansion!

Sincerely,

Brett Mildenberger
