

ATTN; Ravalli County Airport

I thought we were done this battle. Some people apparently just do not want to listen on the commissioners board.

Yesterday I watched one of the larger jets come in for a landing at the airport. I see them frequently from my house just off Grantsdale Road. I am able to watch a few minutes before they land as I have a long open view. I would guess this jet would hold 15 to 20 people. The pilot was skilled from my point of view as he came in slow and when he landed there was a short burst of noise and that's it.

I am convinced that we DO NOT need a longer runway at this airport. We will surely have more noise and pollution. If pilots are having trouble landing maybe they should take lessons from the person flying the jets I watch.
