To Whom It May Concern:

I am writing today to request a 30-day extension on the comment period for the Hamilton Airport EA. I am still working to track down an air quality report specific to Ravalli County which was prepared by the state Department of Environmental Quality. Since the current EA contains no air quality analysis I believe this DEQ information would be valuable and significant.

The EA is a lengthy document several years in the making; another 30 days would not be a burden to the FAA or to a community that has expressed great interest in the airport project over the years. Giving the public an additional 30 days will only result in increased public participation and a better document.

Thank you for your consideration,
