Hello,

I am writing in support of the Ravalli County airport upgrade. My business, Bullitt Communications utilizes the airport to provide communications support to the county's 911 center operations. Response time is critical. While the Ravalli County airport is a safe facility offering a welcoming environment to tourists and air travellers, it needs to be consistent with the current FAA design standards. These design standards will continue to change for the enhanced safety and reduced noise of all those associated with the airport: users and neighbours.

Ravalli County is in a unique position to invest in this vital infrastructure utilizing funds from the FAA's Airport Improvement program. This provides the majority of the funding to accomplish the stated goals of the upgrade.

Please invest wisely in this most important asset to keep it a vital resource for generations of residents, pilots and travellers to come.

Regards,

Scott Richardson
Bullitt Communications
