June 25, 2014

Dear Mr. Norderud:

Our Ravalli County Commissioners are about to approve a major expansion of the local airport and I would like to add my name to the list of county residents opposed to this action, at this time.

The commissioners recently held a meeting with such short notice that only a select few attended. I believe it is inappropriate to undertake an expensive and consequential project without proper review by those affected. Transparency in local government is very important to try to maintain. The local perception is that airport expansion is for the benefit of the very rich at the expense of the working man and woman.

I do not live in the flight path of the airport but, believe me when I say I know when there is a medical emergency flight or firefighting activity in the valley. Flying affects everyone.

This letter does not try to address all the issues here, only to strongly express my opposition to the action.

Thank you for the opportunity to comment.

Sincerely,

Jim Blackburn, Christine Blackburn
