Memorandum For: Ravalli County Commissioners

The purpose of this memorandum is to express my disapproval of the County Airport Expansion.

The total impacts to the new runway modifications have not been assessed and it appears to me someone has "segmented" the requirements to get the project approved. Larger planes will add to air pollution. During fire season, air quality is bad enough.

Did you conduct a noise study, survey the residents in the projected flight path, and prepare an ICUZ? What is the plan to address the noise?

Did you evaluate the new PAPI system installation and its effects on sensitive areas?

The County does not have the funding for this and there are much higher priorities.

I do not know anyone that supports the airport expansion.

Lauren S. Davis, Jr

(Hamilton)

Memorandum for: Council on Planning and Zoning

The total impact to the new highway interchange has not been assessed and a separate study should be conducted. The applicant has requested that the project be approved. A separate study will be conducted to determine the impact of the interchange on the surrounding area.

Did you conduct a noise study to assess the impact of the proposed interchange on the surrounding area? If not, please provide a plan to address the noise.

Did you evaluate the new interchange system installation and its effects on the surrounding area?

The Council should have the authority to require the applicant to provide a noise study.

Do not allow the applicant to proceed with the interchange until the noise study is completed.
