Regarding the Hamilton Airport expansion.....

I don't care where you put that new runway.

But it damn well better be the exact same length we have now.

And the same thickness we have now.

Nothing longer. Nothing thicker.

If you build a new runway that is longer, or thicker,
our quality of life will suffer. Air traffic will increase
in quantity and size and weight with a longer/thicker runway.
And that means noise, congestion and pollution.

Don't spend my property taxes to satisfy jet-setters.
