Rick Donaldson

With all due respect, I am sure you have more against the airport improvements than for it. Knowing that maybe 1 person out of who knows what, 5000. Owns an aircraft and actually uses the airport here, popular vote shouldn't matter.

People are jealous and resentful toward aircraft owners, The few of us that do use it should be entitled to a safe facility, that can grow with the valley and its needs.

It's not our fault that people have purchased land in the traffic pattern and are worried that this will devalue their property. Buy a house next to a pig farm and then complain about the smell ? pig farmers outnumbered by the general public , so shut him down ?

I own a business in this town and can tell you that airport improvement's here will be good for my employees and the overall economy in general.
