Subject: Airport Runway Expansion

Dear Sirs,

Please **do not** allow expansion or extension of the existing Hamilton, Mt. Airport runway. Doing so will only:

1. **benefit only 0.1%** of the population while hurting 99.9%
2. It would create **even more noise pollution** with larger jets being able to land here. (I have no doubt that the EPA would agree)
3. It would create **more air pollution** from the **lead** fuel that the jets burn. (I am sure that the EPA would agree also)
4. It would **lower the property values of at least 500 homes** in the airport area. Most of these homes were here **long before** jets started flying into Hamilton.
In essence it would be a **negative economic impact** for the majority of the community.

Please do not damage our community with this unnecessary expansion that is being proposed.

Thank you.

Gary L. smith MD
