**Subject:** airport

To Daniel Norderud and County Commissioners,

I am opposed to any expansion of the Ravalli County Airport and would like my opinion to be considered and added to feedback from others. As a homeowner and tax paying citizen of this county living right in the backyard of the airport, I am against expansion for environmental/health, property value, populations, noise, etc. reasons. The way of life people choose to protect in our valley does not include hearing, seeing, and dealing with the consequences of a larger airport. People and machines needing a larger airport can go to Missoula where people expect to have to deal with bigger city facilities. Tax paying citizens in the Bitterroot have every right to be consulted and heard when it comes to making important decisions such as this that impact our dollars, long term wellness, and quality of day to day living. In addition, our crop fields used to feed our livestock do not need to be negatively impacted by more pollution. Thank you for your interest, time, and consideration.

From,  
James Musante  
Corvallis
