Subject: Hamilton Airport EA Report

I have some concerns about the recent EA Report. 1. The report does not address the impact on decreased property values for those in the affected area. There has never been any zoning done on this area, nor has everyone involved been informed. 2. The issue of toxic lead from the jet fuel, especially involving flights over the schools close by, was not addresses. 3. The FFA approved the reasonable expansion know as 2A, the citizens approved this expansion, and this EA Report does nothing to change the already approved safety from the FAA. There needs to be a resolution to the areas mentioned above. Thank you.
