**Subject:** Ravalli County Airport expansion

I agree with the 1000 ft. expansion of the **Ravalli County Airport**. The current length is too short for safe operation for any but the smallest of aircraft. Lengthening to 5200ft. will not encourage large aircraft as that length is far shorter than most larger aircraft's "critical field length" used to calculate emergencies, slow braking, runway incursions, etc. The length would simply allow a greater margin of safety. The FAA's ability to fund 90% of the expansion is as terrific bonus.  
Thank you.
