I have some concerns about the recent EA report. 1. There was no mention of decreased property values for those living within the airport affected area, also there has never been any zoning done within this area. 2. Unfortunately, there are air crafts using this airport at the present time that are too large to safely land and takeoff. Many of these pilots are not following the prescribed flight path for take off, and no one seems to be in charge or are unable to enforce what has been established. I am concerned that this report was not a through report, but simply glossed over the real issues. Thank you for your time.
